

TEACHING / LEARNING STRATEGIES OF THE RADIOLOGIC TECHNOLOGY PROGRAM

Regional West Medical Center School of Radiologic Technology, in its role as a provider of education in Radiologic Technology, tries to utilize multiple and varied resources to develop the skills necessary to function as a qualified technologist.

Responsibility: Program Director, Educational Advisory Committee, Instructors, Clinical Staff

Standard: Curriculum

JRCERT 2021 Radiography Standard(s): 1.1, 4.2, 4.5

The goals and objectives of the Program are accomplished through the utilization and administration of the following teaching/learning strategies:

1. Theory lectures covering cognitive objectives using applicable learning aids as appropriate.
2. Psychomotor and affective opportunities in laboratory situations covering the application of theory.
3. Clinical experiences with patients and members of the health care team, enabling students to progress toward independence in the major areas of patient care and radiographic procedures.
4. Opportunities through writing and presentations to enhance skills in communication and foster critical thinking.
5. Individualized opportunities for teamwork and leadership development.
6. Provide learning experiences in post primary modalities.
7. Professional development opportunities beyond the required ASRT curriculum.
8. Evaluations from clinical staff and instructors encouraging student progress in the clinical settings.
